Indian Ports Association

“RFQ for Engagement of Consultants for Feasibility Study on Oil Pollution and Mitigation in Major Ports of India”.

Introduction

Ports are economic and service provision units of a remarkable importance since they act as a place for the interchange of two transport modes, maritime and land, whether by rail or road. Therefore, the essential aspect of ports lies in their intermodal nature. India has a coast-line of over 7517 Kms with 12 major ports and 200 notified non-major (minor/intermediate) ports along the coast-line and sea-islands. These 200 Non-major ports are located in Gujarat (41), Maharashtra (48), Goa (5), Daman & Diu (2), Karnataka (11), Kerala (17), Lakshadweep (10), Tamilnadu (15), Puducherry (2), Andhra Pradesh (12), Orissa (13), West Bengal (1) and Andaman & Nicobar Island (23). Out of these 200 Non-Major ports, only some ports are well developed and provide all-weather berthing facilities for cargo handling. The Maritime Ports operate within the statutory framework of the Indian Ports Act 1908 which applies to all the ports. However, the Major Ports Act 1963 applies only to Major Ports.

India depends almost 75 percent of the oil requirement from abroad and the oil is exclusively transported by tankers that enter various ports located all over India. The oil tankers and other ships visiting the different ports pose a risk to the port as well as coastline areas, whenever they are involved in fire incident, collision, grounding etc. Accidental discharges may involve escape of bunker fuel or oil cargo resulting from a marine incident. The threat is largely a function of the types of oil cargo and bunkers carried the degree of navigational hazards, the weather, and shipping density in the area. The passing merchant ships destined to the ports carrying oil cargo also pose risk to the coastal areas to the waters adjoining the coast.

Port activities can cause deterioration of air and marine water quality in the surrounding areas due to multifarious activities. Hence, for the determination of levels of pollution, identification of pollution sources, control and disposal of waste from various point and non-point sources and for prediction of pollution levels for future, regular monitoring and assessment are required during the entire operation phase of a major port.

Oil-related activities such as single point mooring (SPM), installation, navigation, marine transportation, and oil exploration all have the potential to cause oil spills and pose major threats to the coastal ecosystem along the Indian coast.

Oil spill is a type of pollution that occurs mostly on water as well as on land and can have devastating effects on human being, plant, animal life, and the environment. It occurs mainly as a result of human activity (exploration and transport of oil).

The probable sources of Oil spill are accordingly listed as follows:

- Accidental collision.
- Grounding/sinking.
- Intentional discharge of bilges.
- Blowout.
- Discharge from offshore installations.
- Subsea pipelines carrying crude oil from Oil Rigs to Shore.
- Discharges from Tankers/Ships at Moorings/ Anchorages.
- Oil Exploration.

Devastating Effects of Oil Spill:

1. Fauna: Hypothermia, fire in ocean, death of keystone species, it can blind them hence affects predator-prey relation, poisoning can damage their lungs, liver so have bad effects on food chain.
2. Flora: Thick layer on water hinders the photosynthesis process so death of phytoplankton, zooplankton ultimately affecting marine food chain. All this ultimately affects marine economy (tourism, fishing).

In view of the above it is proposed for engagement of Consultants for feasibility study on Oil Pollution and Mitigation in major ports of India. The consultancy services consist of feasibility study and preparation of feasibility report, detailed study and preparation of detailed project report, preparing detailed cost estimate, technical and commercial specifications and tender documents, financial advisory and bid process management.

The addendum shall be uploaded on the internet site of IPA. To give bidder(s) reasonable time in which to take an amendment into account in their Proposals. Employer may, if the amendment is substantial, extend the deadline for the submission of Proposals.

4. Conflict of Interest

- 4.1 Employer requires that Consultants provide professional, objective, and impartial advice and at all times hold the Employer's interest's paramount, strictly avoid conflicts with other Assignment/jobs or their own corporate interests and act without any consideration for future work.
- 4.2 Without limitation on the generality of the foregoing, Consultants, and any of their affiliates, shall be considered to have a conflict of interest and shall not be recruited, under any of the circumstances set forth below:

Conflicting activities: A firm that has been engaged by the Employer to provide goods, works or Assignment/job other than consulting Assignment/job for a project and any of its affiliates shall be disqualified from providing consulting Assignment/job related to those goods, works or Assignment/job. Conversely, a firm hired to provide consulting Assignment/job for the preparation or implementation of a project, and any of its affiliates shall be disqualified from subsequently providing goods or works or Assignment/job other than consulting Assignment/job resulting from or directly related to the firm's consulting Assignment/job for such preparation or implementation. For the purpose of this paragraph, Assignment/job other than consulting Assignment/job are defined as those leading to a measurable physical output, for example surveys, exploratory drilling, aerial photography and satellite imagery.

Conflicting Assignment/job: A Consultant (including its Personnel and Sub-Consultants) or any of its affiliates shall not be hired for any Assignment/job that by its nature may be in conflict with another Assignment/job of the Consultant to be executed for the same or for another Employer.

Conflicting relationships: A Consultant (including its Personnel and Sub-Consultants) that has a business or family relationship with a member of the Employer's staff who is directly or indirectly involved in any part of (i) the preparation of the Terms of Reference of the Assignment/job, (ii) the selection process for such Assignment/job, or (iii) supervision of the Contract, may not be awarded a Contract, unless the conflict stemming from this relationship has been resolved in a manner acceptable to the Employer throughout the selection process and the execution of the Contract.

- 4.3 Consultants have an obligation to disclose any situation of actual or potential conflict that impacts their capacity to serve the best interest of their Employer, or that may reasonably be perceived as having this effect. Any such disclosure shall be made as per the Standard forms of technical proposal provided herewith. If the consultant fails to disclose said situations and if the Employer comes to know about any such situation at any time, it may lead to the disqualification of the Consultant during bidding process or the termination of its Contract during execution of assignment.
- 4.4 No agency or current employees of the Employer shall work as Consultants under their own ministries, departments or agencies.

5. Unfair Advantage

- 5.1 If a Consultant could derive a competitive advantage from having provided consulting Assignment/job related to the Assignment/job in question and which is not defined as conflict of interest as per para 4 above, the Employer shall make available to all Consultants together with this RFQ all information that would in that respect give such Consultant any competitive advantage over competing Consultants. In this regard, all bidding consultants will be given access to the relevant reports submitted by the consultant for Feasibility Study on 'Oil Pollution and Mitigation' in major ports of India

6. Proposal

Bidder(s) shall only submit one proposal. If a bidder submits or participates in more than one proposal, such proposals shall be disqualified. However, this does not limit the participation of the same Sub-bidder, including individual experts, to more than one proposal.

7. Preparation of Proposals

- 7.1 The proposal as well as all related correspondence exchanged by the Consultants and the Employer shall be written in English language, unless specified otherwise.
- 7.2 In preparing their Proposal, Consultants are expected to examine in detail the documents comprising the RFQ. Material deficiencies in providing the information requested may result in rejection of a Proposal.
- 7.3 While preparing the Technical Proposal, if an Agency considers that it may enhance its expertise for the Assignment/job by associating with other Agencies in sub-consultancy, it may associate with a Agency who has not been technically qualified as a part of the application process of this RFQ.
- 7.4 Depending on the nature of the Assignment/job, Consultants are required to submit a Technical Proposal (TP) in forms provided in Section 3. The section 3 indicates the formats of the Technical Proposal to be submitted. **Submission of the wrong type of Technical Proposal will result in the Proposal being deemed non-responsive.** The Technical Proposal shall provide the information indicated in the following paras from (a) to (d) using the attached Standard Forms (Section 3). Form TP-1 in Section-3 is a sample letter of technical proposal which is to be submitted along with the technical proposal.

- (a) A brief description of the consultant's organisation will be provided in Form TP-2. In the same Form, the consultant will provide details of experience of assignments which are similar to the proposed assignment/job as per the terms of reference. For each Assignment/job, the outline should indicate the names of Sub-Consultants/Professional staff who participated, duration of the Assignment/job, contract amount, and Consultant's involvement. Information should be provided only for those Assignment/jobs for which the Consultant was legally contracted by the Employer as a corporation or as one of the firms within a joint venture. Assignment/jobs completed by individual Professional staff working privately or through other consulting firms cannot be claimed as the experience of the Consultant, or that of the Consultant's associates, but can be claimed by the Professional staff themselves in their CVs. Consultants should be prepared to substantiate the claimed experience along with the proposal and must submit letter of award/copy of contract for all the assignments mentioned in the proposal. In case of confidentiality agreements with clients, a self-certification from the competent authority of the consultant should be provided.
- (b) Comments and suggestions on the Terms of Reference including workable suggestions that could improve the quality/effectiveness of the Assignment/job; and on requirements for facilities including administrative support, office space, data, etc. to be provided by the Employer (Form TP-3 of Section 3).
- (c) A description of the approach, methodology and work plan for performing the Assignment/job covering the following subjects; technical approach and methodology, work plan, and organization and staffing schedule. Guidance on the content of this section of the Technical Proposals is provided under Form TP-4 of Section 3.
- (d) CVs of the Professional staff as mentioned above signed by the staff themselves or by the authorized representative of the Professional Staff (Form TP-5 of Section 3).
- (e) Softcopy of the complete proposal either in CDs or Pen drive in PDF & Word format shall be submitted.

7.5 The Technical Proposal shall not include any financial information. A Technical Proposal containing financial information may be declared non responsive.

8. Proposal Validity

The proposal shall be valid for 180 (one hundred and eighty) days from the date of opening of the proposal.

9. Taxes

The consultant shall fully familiarize themselves about the applicability of Domestic taxes (such as Income taxes and GST etc) on amount payable by the employer under the contract. All such taxes must be excluded by the consultant in the financial proposal. Consultant shall also submit their Registration number under GST and its documentary evidence.

10. Currency

Section 2

(Terms of Reference)

Providing Consultancy Services of Feasibility Study on Oil Pollution and Mitigation in Major ports of India.

Objective:

Prevention of oil spills has as much to do with operational procedures as it does with modern technology and equipment. Following appropriate protocols, as well as maintenance procedures, ensures the safe operation of equipment, aiding in the goal to prevent spills from ever occurring.

Extensive steps should be in place to ensure that operators follow safe operating procedures. Specific Spill Prevention, Control and Countermeasure Plans (SPCC) outline an operator's prevention procedures and are required by the EPA. Best practices are shared across industry to highlight common general prevention measures and share case studies. Maintenance procedures require regular testing and inspection of both process and equipment. Ensuring process safety minimizes the risk of a spill and protects the health and safety of people and the environment. Operational and maintenance procedures are both encouraged and mandated across industry. Prevention, however, is not just the job of industry; consumers also play an important role in keeping oil and other fuels out of the environment by observing proper handling and disposal practices.

Mitigation strategies should be proposed in terms of both preventive and reactive measures. Analysis of the oil spills and its impact along the coast and port areas due to various incidents and accidents should be elaborated/defined in a sequence way.

- i. Oil Pollution emergency plans.
- ii. Oil spill Disaster contingency plan.
- iii. Response Techniques.
- iv. Establish procedures and install control measures.
- v. Mechanisms to manage and mitigate oil spill effect.
- vi. Oil Pollution reporting procedure.
- vii. To prevent a spill from reaching navigable water pathways
- viii. Action on receiving an Oil Pollution report.
- ix. Identification of disruptive events.
- x. Assessment of loss.
- xi. Disposal of Oil.

- xii. Develop and prepare countermeasures to contain, clean up, and mitigate the effects of an oil spill.
- xiii. Post-spill response procedures and equipment locations.
- xiv. Formulate guidelines for use of oil dispersant.
- xv. Formulate guidelines for inspection of equipment, contingency plan etc. for ports and resource agencies.
- xvi. Development of Oil spill modelling system.
- xvii. Development of environmental risk assessment guidelines for oil spill management in coastal waters.
- xviii. Mapping of exo-sensitive areas.
- xix. Development of data, base on environmental parameters.
- xx. Minimise environmental impact by timely containment and recovery response.
- xxi. Maximise effectiveness of recovery actions through selection of appropriate equipment and techniques.
- xxii. Many of the ports are not equipped with first response system.
- xxiii. Co-ordination with national and local Authorities in combating oil pollution.
- xxiv. Suggest optimal strategies for conducting emergency isolation operations of damaged process equipment.
- xxv. Determine the level of contamination of the site as a result of the accident.

Special Terms & Conditions:

1. The Consultant and his team need to co-ordinate with major ports in collecting the necessary documents and information in this regard and hold discussion with the concerned officials of major ports as required in this regard.
2. Draft of the representation need to be forwarded to IPA for its vetting and final representation shall be made after incorporating the changes and additions suggested by IPA.

PART II: TOR related information

1. Conditions under which this RFQ is issued

- i. This RFQ is not an offer and is issued with no commitment. IPA reserves the right to withdraw the RFQ and change or vary any part thereof at any stage.
